

**VERITAS PETROLEUM SERVICES**  
FUEL QUALITY TESTING

**WORLDWIDE  
AIR COURIER  
DIRECTORY**

## 1. Sending your sample for testing

Bunker fuel samples should be submitted to the laboratory for testing as soon as possible after the bunkering operation is completed.

VPS's SampLogic shipping tool is designed to offer pickup of bunker fuel sample, generate the required shipping documents and to track the delivery status of the bunker fuel sample.

### The SampLogic offers the following benefits:

- A single point of contact to activate sample collection. All sample collection requests submitted will be transmitted electronically to VPS appointed courier service provider. There is no longer a need to call the courier service providers to arrange for sample collection.
- To make sure the samples are delivered to the VPS laboratories with no delays, it is essential to get the shipping document right. SampLogic uses the booking details to generate the shipping document which are required to accompany the fuel samples.
- Sample collection request submitted to SampLogic will be issued a tracking number which allow you to monitor the status of your sample at any time.

### Getting Started with Samplogic:

To request for sample collection, please go to <https://samplogic.vpsveritas.com>

Upon receipt of your request, Samplogic will send the shipping document (Proforma Invoice, Airway Bill and an example of an approved MSDS) to the email addresses provided.

All fuel samples need to be accompanied by a Proforma Invoice, AWB and MSDS. You are required to print out the shipping document and submit along with the fuel sample together with a MSDS.

A courier will also be contacted and send to the address you advise the collect the sample and deliver it to the VPS laboratory.

For further assistance you can also email [samplogic\\_admin@v-p-s.com](mailto:samplogic_admin@v-p-s.com)

Alternatively, you may also continue to refer to the VPS Air Courier Directory to contact the couriers appointed by VPS to arrange for sample collection.

## 2. How to use the Air Courier Directory (ACD)

Countries are listed in alphabetical order. Shown under each country is the colour of the appropriate address label to be placed on the Forwarding Box when despatching samples.

### Example:

The ship may be bunkering in Hamburg, Germany. The Air Courier Directory shows that the label colour for Germany is pink, indicating that one of the pink address labels marked for the VPS laboratory in Rotterdam must be used.

Check the contact details of the DHL service centre.

**DHL Airways GmbH**

Phone: +49 18 0634 53003

For some countries, two different couriers are listed, one of which should be selected for the shipment.

## 3. Forwarding address

The laboratory address to which the sample should be sent is shown on the consignee shipping label (see page 2). Before affixing the address label, it is important to refer to the Air Courier Directory for details on the country to which the fuel sample should be dispatched so as to ensure that the correct label is used.

## 4. When the Courier arrives

Any package forwarded by a courier must be accompanied by an Airway Bill (AWB). The courier will provide an AWB to be completed with the following information:

"FROM" The name and address of the shipper. Enter the ship's name in the "Shipper's Reference".

"TO" Name and address of VPS' laboratory, as indicated on the address label.

## 5. Special instruction for Singapore

To arrange collection of the bunker fuel samples from the agent's office, please contact VPS Singapore at +65 9838 6488.

## 6. Special instructions for the Port of Rotterdam and Antwerp

VPS has established a network of sample 'drop off' points in the ports of Rotterdam and Antwerp. Please arrange with the ship's agent in Rotterdam and Antwerp to have the sample(s) dropped off at the nearest VPS collection point after he/she leaves the ship.

Locations and details of the sample drop off points are shown on page 4 (for Antwerp) and page 7 (for Rotterdam) of the Air Courier Directory.

When the ship's agent has decided which is the most convenient 'drop off' point to use, please ask him/her to read the following instructions:

On arrival at the 'drop off' point you should:

- Ask the attendant for the VPS' logsheet and key.
- Complete the logsheet with date, time, name of the ship and number of samples delivered.
- Use the key to open the sample collection box.
- Place sample(s) together with Pro Forma Invoice in the collection box.
- Lock the box and return the key and the logsheet to the attendant. Any other confirmation to VPS is not necessary.  
The collection box will be emptied daily, except on Sundays.

If you experience any problems, please call the number given on the Forwarding Box label.

The best recommended process is to submit your collection request using SampLogic via <https://samplerlogic.vpsveritas.com>

If the use of SampLogic is not feasible due to the accessibility of Internet, you may email the following information to [Inbound.Logistics.Sng@v-p-s.com](mailto:Inbound.Logistics.Sng@v-p-s.com)

- Vessel's Name
- Name of Shipping Agent
- Pickup Address
- The Name and Contact No. of the person responsible for dispatching the sample
- Date the sample will be available for collection

Veritas Petroleum Services (VPS) delivers testing, inspection and advisory solutions that help our customers achieve measurable improvements to fuel management, fuel cost, operational efficiency and compliance with marine fuel regulatory requirements.

In close collaboration with the industry, we introduced the first commercial bunker fuel testing and bunker quantity surveys for ships in 1981 and 1987, respectively. Today, customers remain at the heart of our business as we continue to expand our business.

We operate a global network of customer service offices supported round-the-clock by technical experts and four specialised and wholly-owned fuel testing laboratories strategically located in Rotterdam, Singapore, Houston and Fujairah. Our bunker quantity surveys are available at more than 200 key bunkering ports worldwide.
